

## **Corona protective measures for ALTENPFLEGE 2022 in Essen**

To protect all trade fair participants and visitors, we implement the following hygiene measures:

### **Mandatory masks**

OP mask or FFP2 mask mandatory in the entire event area for all participants, except:

- for the necessary intake of food and beverages.
- Children up to school age are exempt from the obligation to wear a mask.
- Children from school entry to age 13 must wear at least one everyday mask.
- Exhibitors may remove their masks if they are replaced with glass or Plexiglas for effective protective measures such as partitioning.
- in the outdoor areas, the so-called open-air areas.

The security service will draw the attention of trade fair participants to the obligation to wear masks throughout the exhibition area indoors.

### **General hygiene rules**

- Please stay at home if you have any symptoms of illness!
- If possible, keep a distance of 1.5 m from people you do not know!
- Where this cannot be maintained, please wear a mask!
- In general, please observe the AHA rules as well as the cough and sneeze etiquette!

### **Hygiene measures for the ALTENPFLEGE**

- Multilingual information boards on hygiene protection throughout the exhibition grounds.
- Waiting areas are generously designed. Should queues nevertheless form, visitors are advised to wear a mask.
- Sufficient hand washing detergent is available at all washbasins in the toilet facilities.
- Disinfectant dispensers are available throughout the event site
- Sanitary facilities and surfaces are disinfected regularly
- The ventilation system is operated with an outside air proportion of 100%.

### **Gastronomy**

Additional hygiene measures are recommended for gastronomic offers:

- Regular cleaning / disinfection of contact surfaces.
- The infection-proof cleaning of objects or tools used close to the body after each use.
- the rinsing of dishes at least 60°C with a sufficient amount of rinsing agent, a sufficiently long soaking time in the sink as well as careful manual cleaning and subsequent thorough drying. The surfactants / rinsing agents must be able to damage the virus surface and inactivate viruses. Alternatively, the use of disposable tableware produced as sustainably as possible is permissible.
- The washing of used textiles at 60°C, with towels to be changed after one use and otherwise disposable towels to be used.
- Service personnel should only serve food and beverages.
- Stand catering personnel are required to wear masks throughout.
